

I am a resident of in the area that K-Love serves on 89.3 and K-love is the best radio station I have ever listened to. I do not have to fear hearing trash coming from my radio when anyone is with me (or not). Many of my friends listen to K-love and do not have access by computer as I can during the day. If you displace K-love, then what will we listen to? The other Christian stations play a lot of talk shows, which while good, is not what many of us want to listen to all the time.

Plus, the fact that I can listen to the same music at my home, my office, or in my care is the same music that my children and grandchildren can listen to in the state that they live in(WI), making us feel a bit more connected.

Please reconsider your plan to make the changes that you are proposing that will end my/our being able to hear K-love.

To put it simply, we Love K-Love!
